Bangalore | IN

Skills

- **Programming Languages:** Python, JavaScript, Golang, SQL, Bash scripting
- **Web & API Frameworks:** Django, Django Rest Framework (DRF), Fast API, Gin, React.js, Next.js
- **Databases (Relational & NoSQL):** MySQL, PostgreSQL, MongoDB, Redis, Pgvector, Memcached, ORM, SQL Alchemy, Database Design
- **APIs & Communication:** RESTful APIs, JSON, gRPC, Protocol Buffers, HTTP/HTTPS, Web Sockets, SMTP, Payment gateway integration.
- **DevOps & Deployment:** Git, GitHub, Version Control, Containerization, Docker, Docker Compose, Docker swarm, NGINX, Reverse proxy, CI/CD, Load Balancing, Celery, Celery Beat, Flower
- **Cloud Platforms:** Linux, AWS, EC2, S3, CloudWatch, IAM, SSM, Cloudflare
- **Authentication & Security:** JWT, OAuth 2.0, CORS, CSRF Protection, TLS/SSL, Cloudflare Turnstile
- **Software Development Practices:** Microservices, Caching, Rate limiting, OOP, Data Structures and Algorithms, Problem Solving, Debugging, Code Reviews, Agile Methodologies, Responsive Design, Basic UI/UX Principles
- **Testing, Automation & Documentation:** Unit Testing, Selenium, Postman, Swagger, Troubleshooting, Logging
- **Data & Machine Learning:** RAG, MCP, LLM, NumPy, Pandas, Matplotlib, Scikit-learn, TensorFlow, Tableau, Web Scraping, Data Analysis

Work Experience

BACKEND DEVELOPER - Trade brains - Bangalore, IN

June 2025 - March 2026

- Developed and deployed multiple backend APIs and internal admin dashboards for user management, subscription control, transaction monitoring, coupon/affiliate management, and signed document access, improving operational efficiency for internal teams.
- Implemented SEBI-compliant KYC workflows by integrating CAMS PAN verification and Pichain digital document signing, enabling secure and compliant purchase of research reports by verified users.
- Migrated platform storage infrastructure from a legacy AWS S3 account to a new AWS environment, updating all database references and ensuring seamless transition with no disruption to existing services.
- Maintained and integrated backend services including Telegram notifications for research releases, attendance tracking with calendar visibility, and Celery-based market data pipelines (CMOTS), while identifying and resolving data inconsistencies across the platform.

MEAN STACK DEVELOPER INTERN - LTIMindtree - Chennai, IN

July 2022 - September 2022

- Built a strong foundation in HTML, CSS, and JavaScript, gaining core web development skills.
- Developed experience with MongoDB and cloud databases, applying full-stack development and deployment during my internship.

Education

MASTER OF TECHNOLOGY - Vellore Institute of Technology - Chennai, IN

Oct 2022 - July 2024

Majors: Data Analytics, Artificial Intelligence and Machine Learning

BACHELOR OF ENGINEERING - St. Joseph's College of Engineering - Chennai, IN

July 2018 - June 2022

Majors: Computer Science Engineering

Projects

GSIM WEBSITE - A FULL STACK WEBSITE FOR A MUSIC SCHOOL - [Website link](#)

March 2025

- Developed responsive music institute website with admission forms, recital showcases, admin dashboard, and Razorpay payment integration.
- Implemented an admin dashboard and integrated Razorpay to enable secure online payments and streamline student enrollment.

ROOMIFY - A COLLABORATIVE MUSIC PLAYER - [App link](#)

August 2024

- Developed a collaborative music streaming player using Django and React integrated with the Spotify API.
- Built a collaborative music room system where hosts control playback and guests vote to skip songs, enabling shared listening sessions.
